PROFESSIONAL SUMMARY

Full-Stack Software Engineer intern with experience building production-grade CRM and inventory systems. Skilled in JavaScript, React.js, Node.js, Python, PostgreSQL, and REST APIs, with hands-on AI-powered application development. Collaborative team player with a track record of delivering measurable business outcomes through engineering and system design.

EXPERIENCE

- Software Developer Intern | Paid — 15,000/Month**Jun 2026 – Oct 2026
- Opstech Solution Pvt. Ltd.*Pune, Maharashtra
- Engineered and deployed a full-stack CRM managing 2,000–3,000+ customer records across 11 modules, reducing data retrieval time by ~90% and manual data entry by ~65%.
 - Built a scalable inventory management platform supporting 1,000+ SKUs and 10,000+ transactions with 20+ automated workflows, cutting manual operations by 65–75% and stock retrieval time by 80–90%.

TECHNICAL SKILLS

Languages & Scripting: JavaScript, Python, HTML5, CSS3, SQL
Frontend: React.js, Bootstrap, Flexbox, Next.js
Backend & Databases: Node.js, FastAPI, REST APIs, WebSockets, PostgreSQL, DBMS
AI Tools: Lovable, Claude AI, ChatGPT, Gemini, GitHub Copilot, Antigravity
Tools & Platforms: Git, GitHub, VS Code, Postman
Concepts: System Design (Basics), Data Structures, Operating Systems, Networking, Software Testing

PROJECTS

- CRM Software – SR Enterprises** | *React.js, Node.js, PostgreSQL, HTML, CSS, JavaScript*2026
- Developed and deployed a full-stack CRM managing 2,000–3,000+ customer records, reducing data retrieval time by ~90%, manual data entry by ~65%, and record-loss risk by ~90%.
 - Automated 10+ business workflows across 11 modules with 24/7 searchable customer history, significantly improving operational efficiency and data reliability for the client.
- Inventory Management Software** | *Python, FastAPI, REST API, WebSockets, PostgreSQL, React.js, JS*2026
- Built a scalable inventory platform supporting 1,000+ SKUs and 10,000+ transactions, with 20+ automated workflows across 8 modules delivering 65–75% reduction in manual operations.
 - Implemented real-time stock updates via WebSockets and REST APIs, achieving 80–90% faster stock retrieval and significantly reducing inventory discrepancies.
- Campus Buddy – AI Campus Management System** | *AI, Full-Stack, JavaScript*2025
- Engineered an AI-powered campus platform with timetable management, event notifications, admin workflows, and a 24/7 chatbot; delivered a full prototype in under 2 weeks using AI-assisted development, reducing build time by ~60%.
- Responsive Portfolio Website** | *HTML5, CSS3, Bootstrap, JavaScript*2025
- Built a fully responsive portfolio with optimized load performance and consistent cross-device rendering across mobile, tablet, and desktop viewports.

CERTIFICATIONS & ACHIEVEMENTS

- Prompt Engineering – 1st Rank** | *Competition #2025, Ajeenkya DY Patil University*2025
- Secured 1st rank by crafting precise, context-aware prompts maximizing LLM output quality across diverse problem statements in a university-level competition.
- Prompt Engineering – 2nd Rank** | *Technovanza 2025, ADYPSOE*2025
- Achieved 2nd rank at Technovanza 2025 (ADYPSOE) designing advanced prompts for automation, code generation, and content creation use cases.
- UI/UX Design Certification** | *NxtWave CCBP 4.0*2025
- Trained in UI/UX principles, wireframing, user-centered design, and web application prototyping.
- Responsive Web Design Certification** | *NxtWave CCBP 4.0*2025
- Certified in flexible layouts, CSS media queries, Bootstrap grid, and mobile-first development.
- Database Management System (DBMS) Certification** | *NxtWave CCBP 4.0*2025
- Trained in SQL querying, schema design, normalization, and relational database administration.
